

ASSIGNMENT STATEMENT:

Assignment 1 — Your Personal CV Page

Difficulty: Foundational · **Covers:** Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · **Folder:** assignment-1/

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An “About Me” section.
- An “Education” section listing your academic history in a semantic list or table.
- A “Skills” section.
- A “Contact” section with a real `<a href="mailto:...">` link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<footer>` as appropriate, not a page built entirely out of unstyled `<div>`s.
- Styling entirely in a separate `styles.css` file (external stylesheet, not `inline style=""` attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.

Deliverables in assignment-1/: `index.html`, `styles.css`, any images, and your completion PDF.

Output:

Curriculum Vitae - MBM

SummaryEducationProjectsSkillsExperience

Mohammad Bin Mohsin

Ali Block, Street 3, Sector B, Bahria Town, Lahore | mbinmohsin.5426@gmail.com

Summary

4th Semester student with experience in field work and data manipulation, looking for an internship in IT Department OR any Computer related field.

Education

COMSATS UNIVERSITY LAHORE | Bachelor in Computer Science (Expected 2024 – 2028)

Current CGPA: 3.27 / 4.0

Relevant Coursework: AICT, Programming Fundamentals, Database Systems, Computer Networks.

BEACONHOUSE COLLEGE PROGRAM, BAHRIA TOWN | A Levels (2022 – 2024)

BEACONHOUSE SCHOOL, BAHRIA TOWN | O Levels (2019 – 2022)

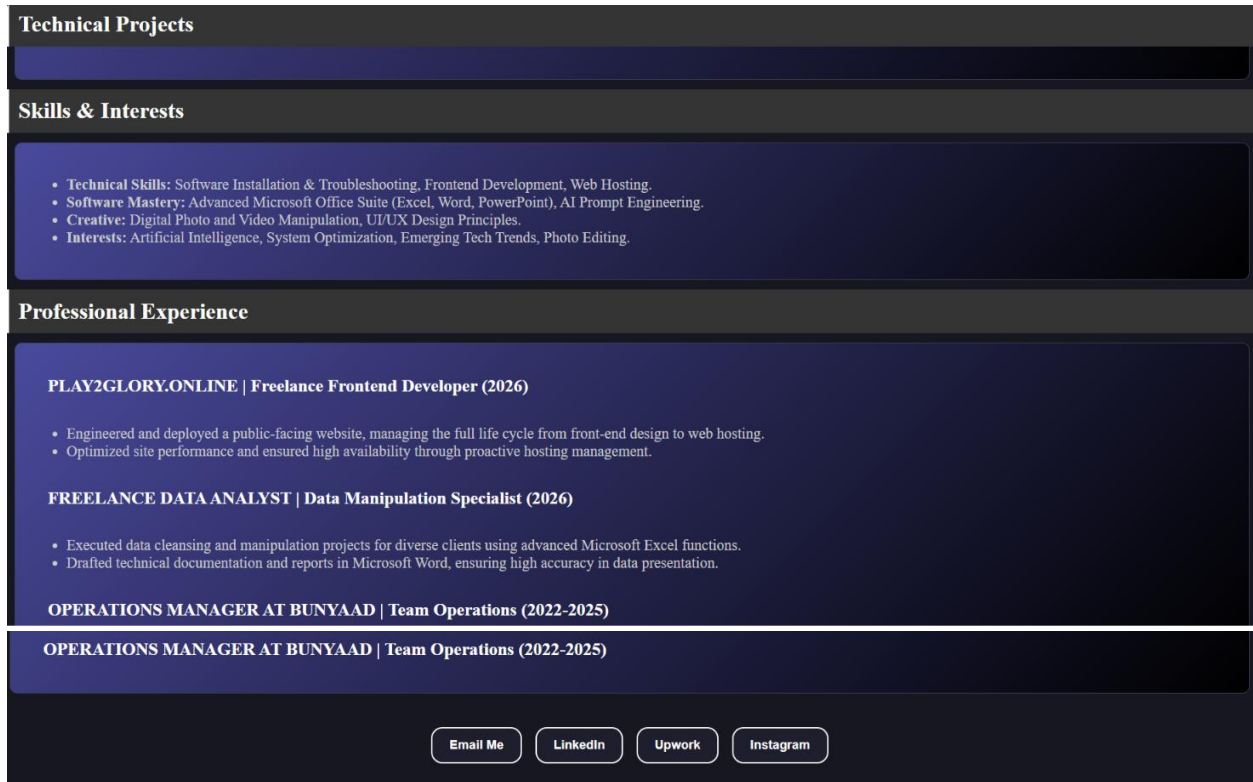

Technical Projects

MOODSTREAM MEDIA APP | Developer With Ahmad Ali Khan

- Developed a media-focused application interface in collaboration with a partner from an external university.
- Integrated media streaming logic and focused on front-end responsiveness to ensure cross-platform compatibility.

BAKERY DATABASE SYSTEM | Database Architect with Team

- Designed and implemented a relational database structure to manage inventory, sales, and customer data.
- Optimized SQL queries for efficient data entry and retrieval, reducing manual record-keeping time.
